

The №1 choice for the home chef

STELLAR

Eclipse Bakeware

Before first use

- Remove any residual label adhesive.
- Wash in hot soapy water, rinse and dry.

Use

! Stellar Eclipse Bakeware is for oven use only - not suitable for hob, grill or microwave use.

- Stellar Eclipse Bakeware is guaranteed for oven use up to 240°C (Gas Mark 9, 460°F).
- Always use oven gloves or similar when moving the bakeware around the oven.
- Allow bakeware to cool before plunging into washing water - pouring cold water into hot bakeware may cause warping.

Non-Stick Surfaces

- Use only nylon or wooden tools as metal tools and harsh abrasives will degrade the non-stick coatings.
- Do not cut food with a knife in the bakeware.
- Take care to avoid scratching non-stick surfaces when storing.

Cleaning

- Wash in hot soapy water after every use.
- Soak bakeware and use only nylon scouring pads to remove burnt-on deposits. Dry immediately.

Dishwasher Use

- Stellar Eclipse Bakeware is dishwasher safe; however, it should be removed immediately after dishwashing and dried straight away, ensuring you tilt to release any trapped water that might remain in the rolled edge.

Stellar kitchenware is built for your most adventurous recipes.

When you purchase Stellar, you purchase years of knowledge and innovation for precise performance and unfaltering reliability.

We love our cookware as much as you love cooking. So we're here to make sure your purchase can be enjoyed time after time, for a lifetime. Should you need any support with your product or guarantee, please contact our expert care team.
